#### Sustainability/SCS Certification

As a matter of corporate philosophy, Encore is committed to intelligent environmental policies and practices. Standard recycling procedures and ecologically sensible policies and practices have been implemented throughout all aspects of our operations/facilities, and as it relates to new product development and project management. Additionally, we insist on a similar operational philosophy from our vendor-partners.

In accordance with our ongoing efforts to develop and manufacture products that positively contribute to healthy environments, Encore has completed testing for Indoor Air Quality certification, achieving SCS Indoor Advantage Gold for the majority of seating and table products.

By attaining SCS Indoor Advantage Gold certification, we not only meet the criteria of BIFMA M-7.1 and X-7.1 (low-emitting office furniture systems and seating) but also the LEED-Commercial Interiors EQ 4.5 credit for Indoor Air Quality of office furniture.

We will continue to strive towards developing products that positively contribute to healthy environments, as well as set new benchmarks for making sustainable improvements in all areas of our business. A representative example of other in-force measures Encore employs to support intelligent environmental policies include:

- Ensure product life-cycle longevity and non-obsolescence via the design, engineering, and manufacturing processes and subsequent product refurbishment and re-use potential.
- Design products, and/or re-engineer existing to maximize the use and or re-use of recycled and/or recyclable components and sub-parts.
- Specify, and utilize 'engineered pre-cut' foam, which eliminates virtually all on-site scrap foam waste.
- Increase the use of recyclable materials as appropriate for all general office, marketing, manufacturing, and shipping applications.
- Eliminate use of any non-recyclable packaging materials.
- Utilize alternative shipping methods such as 'blanket-wrapped delivery' whenever possible as well as consolidate freight to reduce overall fossil fuel consumption and carbon emissions.
- Minimize the generation of, recycle, and/or ensure the proper disposal of all office-generated waste materials.
- Contract for the external use of scrap leather cutting remnants.
- Participate in fabric tube and memo sample take-back programs.

We are committed to being a leader in the practical application of current and future technologies that will protect our environment today, and for future generations to come.

**Customer's Own Material** COM should be shipped prepaid to:

Encore Seating, Inc. Attn: COM Department 5593 Fresca Dr. La Palma, CA 90623

All packages should be marked with customer's name, customer's order number and items to be covered. Collect shipments of COM/ COL fabrics will not be accepted. Please furnish a sample cutting of COM or COL with the original purchase order so that identification of COM/COL can be verified. In the absence of specific written instructions accompanying the order, fabrics will be cut, seamed and applied at our discretion and at the customer's risk. An additional fee may be assessed for COM or COM materials that are deemed atypical should additional labor be required to cut, sew and/or match said materials.

While we inspect fabrics for mill imperfections, some are difficult to recognize. As such, we cannot be responsible for defects, color inaccuracies, dye lot variations and other flaws and suggest that our customers inspect fabrics before furnishing them. Under no circumstances will we assume responsibility for COM/COL shortages, flaws or other such problems. While we make a concerted effort to control COM/COL fabrics, it is not our responsibility to police the receipt of COM/COL's in order to meet delivery deadlines and we assume that customers are aware of any undue delay in the delivery of their COM/COL fabrics.

Encore cannot be responsible for defects, color inaccuracies, dye or lot variations and other flaws and suggests our customers inspect fabrics before furnishing them. Under no circumstances will we assume responsibility for COM shortages, flaws or other such problems.

#### Polyurethane

Polyurethane fabrics and other PVC-free materials may be susceptible to "puddling" or comfort wrinkles over time. This is due to the inherent properties of the fabric and not an indication of inferior upholstery techniques. Please keep this in mind when selecting fabrics for upholstery.

#### **Fire Resistance**

Encore manufactures all of its chairs to comply with California Technical Bulletin #117 (Cal TB 117). If Customer's Own Material (COM) is specified, Encore is not liable for said COM fabric's non-compliance with Cal TB 117.

California Technical Bulletin #133, the Flammability Test Procedure for Seating Furniture for Use in Public Occupancies, was repealed by the California legislature on January 22, 2019. If compliance to TB133 is required, add \$50 List per yard of fabric utilized by the seating product specified for the application of a fire barrier.

#### **Fabric Application**

COM fabric is cut "up the roll" as a standard cutting procedure (see chart below). Customer must specify that the fabric be cut in another direction (i.e. "railroaded") if required.

It is imperative that all COM fabrics sent to Encore be "backed" with, at minimum, an acrylic or similar backing. We cannot be responsible for stretching of fabrics that are not backed subsequent to upholstery process. Additionally, we cannot be held responsible for the appearance, behavior, quality or performance of any COM as well as COM's that are rolled reversed by the fabric supplier.

The application of patterned fabrics on curved seating units will be stitched to match pattern requirements. Geometric, linear and striped fabrics will be stitched together to provide the best match, however, a "V" pattern may be the result which is not considered to be a flaw. Additionally, due to varied stretch properties among fabrics, slight wrinkling or puddling may occur. Contact our Client Services Department for any concerns regarding upholstery selections.

#### Yardage Requirements

COM yardage requirements shown in this price list are based on using fabric which is plain (i.e. non-directional) and a full 54" wide. Fabrics of narrower widths and/or that involve matching repeats will require additional yardage. Use the chart below to determine the necessary additional yardage for both directional fabrics and narrow width fabrics.

If you are using a printed or striped fabric with a repeat, use this table:

Increase COM Requirement by:
0%
12%
18%
25%
40%

Yardage requirements may be less than indicated on large quantity orders. Contact client services with specific chair quantities for exact yardage required.

If you are using a plain fabric less than 54" wide or a pattern that will be applied railroaded, contact client services for assistance, as additional yardage may be required. If you are using a plain fabric less than 54" wide or a pattern that will be applied railroaded, contact client services for assistance, as additional yardage may be required.

#### **Upholstery Combinations**

For fabric, vinyl or leather upholstery combinations, pricing will be calculated as follows:

- When combining two COM/COV/COL fabrics, or fabrics with the same grade, add \$85 List per unit.
- When combining three or more COM/COV/COL fabrics, or fabrics with the same grade, add \$115 List per unit.
- When combining different grades of fabric, price will be based on the highest grade specified.

#### Additional Fabric Programs

Encore offers a selection of its own fabrics and leathers for upholstery. Refer to the presentation cards offered in our commercial catalog. Along with these fabrics, Encore, in conjunction with Architex, Camira, Designtex, Maharam, Mayer, Momentum and Stinson, develops additional fabric programs to allow our customers to simplify the ordering of products and fabrics at one time. Please refer to the Textile Partner Program brochure or contact client services for additional information.

For custom wood finishing, please add one-time upcharge of \$450 List per color, per order, for all products.

#### Wood Finish Maintenance

As with all fine finishes, care should be taken to protect the finish from sharp, unprotected objects. The top coat has a natural characteristic to repel the most common liquids used around wood components, yet spills or soil marks should be cleaned up immediately to avoid moisture seeping into open-pore areas. Please note that constant polishing and cleaning of the finish may raise the sheen level, whereas neglect in cleaning will dull and possibly abrade the finish.

Encore provides a lifetime warranty for all seating products to be free from defects in material and workmanship on structural frame components. All other materials fall under the applicable warranty periods listed in the table below. The company will repair or replace, at its option, without charge to the original purchaser only, defective products or parts that fail during normal use (normal use is defined as eight (8) hour days, five (5) days per week) throughout the applicable warranty period. Field labor and service(s) are not covered under this warranty.

Lifetime Warranty	Frame Components Adjustable Arms and Arm Pads Mechanisms Gas Cylinders
10 Year Warranty	Foam Exposed Wood Components Tables Tablets
4 Year Warranty	Casters Mesh and Knit Materials
2 Year Warranty	Stool Footrings
1 Year Warranty	Fabric/Vinyl (excluding COM, COV and COL) Electrical Units

COM, COV and COL are also not covered by this warranty. Normal wear and tear is the responsibility of the specifier. Please consult with upholstery material suppliers for performance criteria of individual materials.

Due to the inherent stretch properties of certain woven and/or vinyl upholstery materials, Encore cannot be held responsible for wrinkles or "puddling" that can occur in some materials.

If product fails under normal use within the warranty period, please send description of the pertinent part, together with proof of purchase of the product to:

Encore Seating, Inc. Attn: Client Services 5692 Fresca Drive La Palma, CA 90623

Email: clientservices@encoreseating.com Fax: 714.562.8202

The foregoing warranty excludes any damages or defects caused by abuse of this product or its use for a purpose other than what the chair was intended. 4. Seat Height Adjustment easily raises or lowers seat to desired height. To raise, lift weight off seat and pull upward on lever until seat reaches a comfortable height. To lower, lift upward on lever while seated and release to lock seat into desired position.

5. Back Angle with Infinite Lock Lever provides precise back angle control. To adjust, lift up on lever until desired back angle is reached. To freely make adjustments without touching lever, move lever into highest postion, adjust back angle, then push lever downward to lock into place.

6. Optional Seat Slider adjustment provides 2½" front and back horizontal seat depth adjustment. To operate, lift up on adjustment bar and move seat forward or backward until desired depth is acheived. Release bar and seat will lock into position.

#### Weight-Activated

1. Tension Lever allows for greater spring tension control for a firmer or softer tilting motion. Push downward and back to increase tension, pull forward and up to decrease tension.

2. Seat Height Adjustment easily raises or lowers seat to desired height. To raise, lift weight off seat and pull upward on lever until seat reaches a comfortable height. To lower, lift upward on lever while seated and release to lock seat into desired position.

3. Multi-Position Tilt Lock Lever allows back to be secured into a tilt position, locked entirely, or enables it to free-float. To secure chair into tilted position, adjust back to a moderately reclined angle, then push downward on lever to middle position to lock into place. To lock at an upright angle, pull lever into uppermost position. To release and free-float, push lever downward to its lowest postion.

4. Optional Seat Slider adjustment provides  $2\frac{1}{2}$ " front and back horizontal seat depth adjustment. To operate, lift up on adjustment bar and move seat forward or backward until desired depth is acheived. Release bar and seat will lock into position.
