lapella

Refined yet relaxed, Lapella offers a light, elevated presence with effortlessly soft comfort. An internal frame subtly reveals itself, shaping the architectural silhouette and providing a structured foundation for perfectly proportioned seat and back cushions. Slim metal legs further enhance its modern simplicity while offering an approachable feel designed for everyday use.

Designed by David Ritch and Mark Saffell of 5D Studio

Sofa and love seat, shown with Outset occasional tables.

Inspired by the clarity of modernist design, Lapella pares seating down to its essential elements. By embracing a thoughtful reduction of form, this intentional restraint allows craftsmanship to take center stage.
